

Searching Pixtantly

Can I find people other than by name?

Yes, Pixtantly has an advanced search feature which allows you to find users by name, account type, keywords, location and proximity based location.

- From the main timeline screen, click on the search icon in the top header.
- Click on the advanced tab and enter information in the fields you'd like to search by.

Examples:

For example if you only want to search for accounts that are listed as Athletes, you would choose Athlete from the Account Type field and hit search to locate all accounts listed as an Athlete.

Search fields are cumulative so you can search by one more criteria. So for example you can search for Athlete accounts in the United States only.

Searching Pixtantly

The screenshot shows a search interface with a dark background. At the top, there is a back arrow and the text "Search any criteria". Below this, there are two tabs: "QUICK" and "ADVANCED", with "ADVANCED" being highlighted in green. The search criteria section includes several input fields: "Username", "Display name", "Account Type: Athlete" (with a dropdown arrow), "Keywords", "United States", "Select States", and "Select City".

If you want to get more precise with the location, you can narrow it down to a city or even within a certain distance from that city. Example you are looking for Athlete accounts that live within 40 miles of Dallas Texas.
